Current	10amp
Average Drying Time	15 Seconds
Drip Proof	IPX1
Noise Level	70db
Operation	Infra-Red
Net Weight	10.5Kg
RPM	25,000
Size	267mm w / 235mm h / 210mm d
Warranty	2 Years

Useful Information

The HD360B is a firm customer favourite when it comes to high speed commercial hand dryers. If you are wanting to keep a traditional look in your wash room but also want a dryer that's in line with current technology, then this is the one for you. We have kept the classic look but tweaked it to bring it in line with today's expectations when selecting a high-speed hand dryer. We've done away with the push button operation that runs for 40 seconds, whether you are there or not, and replaced it with a much more hygienic and energy conscious infra-red start stop. Starts when hands are there, ends when they are removed so no idle running time. It's also got a powerful long life 7,500rpm motor that will dry hands in around 15-20 seconds. You will be pleased to hear that it doesn't sound like an aeroplane taking off either. At only 70db, slightly louder than normal conversation, it's one of the quietest high-speed hand dryers available.

Suited to medium traffic washrooms with up to 30 staff potential users per day. In a brushed top-grade stainless-steel finish, this dryer would look great in any wash room!

In the Box: 1 x HD360B Hand Dryer, Screws, Wall Plugs, User Manual
