Useful Information

Until now, it has been relatively unheard of within the wash room supplies industry to have a hand dryer that performs a 10 second average dry time without sounding like a small plane taking off. At 120M/S the MX2000 is almost twice as fast at drying than all hand dryers in this price bracket!

What really stands out and sets the MX2000 apart from 99% of other hand dryers is the energy it uses to deliver its high-speed drying. At just 550 Watts a cool jet blade of air passes through 22 micro jets that will deliver around 100 dries for an incredible 2 Pence in energy usage! To draw a comparison, most high-speed hand dryers operate at close to 2000 Watts making the MX2000 almost 75% more energy efficient whilst still delivering outstanding and often unrivalled drying times. Once more, it's also one of the quietest hand dryers in its class at just 72db!

If your business or place of work is looking to reduce costs as well as carbon footprint then this is the hand dryer for you
