Useful Information

At just half the size of a leaf of A4 paper it's hard to believe just how powerful this hand dryer is! Its airflow is a staggering 100 meters per second! It will leave hands bone dry in 8 – 10 seconds and at only 70db it's not going to sound like a Boeing 747 taking off!

It has the very latest technology for 2017 including a long-life motor and 'You Choose Technology' This allows you to control the power consumption of the dryer at the flick of a hidden internal switch. For the eco warriors out there, you may opt for the cool air setting. At just 500 watts this makes the Vblast the most energy efficient high-speed hand dryer in the World delivering a staggering 110 dries for around 2p electricity usage! For those winter Months, you may like to revert to warm air setting. Due to the advanced motors and heating elements the warm air setting is also very economical delivering 110 dries for around 5p electricity usage.

The design of the Vblast is very modern and would look great in any washroom. It is constructed using a one piece 304 stainless steel making it both rust proof and vandal resistant. It's going to look great for many Years. A nice feature is the air outlet, it is surrounded by a ring of led lights that will illuminate the dryer's hands in blue when in the drying zone.
