## Useful Information

Let's face it. You don't want to be hanging around the wash room any longer than you need to. I'm sure that you have been unfortunate enough to come across hand dryers that are so slow that your only 'let's get out of here fast' option was to dry your hands on your clothing rather than wait for what seems like an eternity!

The GustAIR will take your hands from wet to dry in a very impressive 10 seconds leaving most of its rivals behind.

Fast hand dryers have a stigma attached to them. Some people say they sound like small aircraft taking off! With this in mind we wanted to bring you a high-speed dryer that's easy on the ear. The GustAIR is only 72db at full speed making it one of the quietest hand dryers in its class.
